Measuring Document Thickness

Need to know what size to buy? Simply use our width chart below to measure your document thickness. If your document is right on the line, we suggest you go up to the next size available in the product you are interested in. Please notice that not all sizes come in all binding products. Binding Products are listed in each box for the sizes they come in. In between the blue lines are the maximum thicknesses that will work with that size binding product.

3/16" Comb

1/4" Comb & 1/4" 19 Loop
